MINECORE GROUP

AI & Automation Implementation Agency

Make More Money, Work Less

Transforming businesses through intelligent automation solutions that increase revenue, reduce overhead, and free up time for strategic growth.

Executive Summary

Minecore Group is a cutting-edge AI and automation implementation agency founded in 2024, specializing in delivering rapid business transformation through intelligent automation solutions.

Our mission is simple yet powerful: help businesses **make more money while working less** by implementing strategic automation that eliminates manual tasks, reduces operational overhead, and accelerates revenue growth.

2024 Founded	**30-90%** Time Savings
2-4 weeks Implementation	**ROI+** Guaranteed

Company Profile

Our Story

Born from the challenges of solo entrepreneurship, Minecore Group was founded by an entrepreneur who experienced firsthand the struggle of managing every aspect of a growing business. After years of working long hours on repetitive tasks instead of focusing on core business strategy, our founder discovered the transformative power of AI-driven automation.

The breakthrough came when implementing automated systems reduced weekly workload by 70%, while simultaneously increasing revenue by 40%. This experience sparked the vision for Minecore Group: to help other entrepreneurs and business owners achieve similar breakthroughs.

Today, we specialize in identifying and implementing the highest-impact automation opportunities that deliver immediate results and long-term competitive advantages.

Core Values

- **Agility:** We move fast and adapt quickly to deliver results that matter.
- **Focus:** We concentrate on high-impact solutions that drive measurable outcomes.
- **ROI-Oriented:** Every solution must demonstrate clear return on investment.
- **Listen & Solve:** We understand your challenges before proposing solutions.

Market Position

Geographic Focus

Current Market:	Montreal, QC
Expansion Target:	North America
Service Delivery:	Hybrid (Local + Remote)

Competitive Advantages

Entrepreneur-to-Entrepreneur Understanding
Not a vendor in your shoes and understand the unique challenges of running a lean operation.

Rapid Implementation
Our streamlined approach delivers working solutions in weeks, not months.

Cost-Effective Solutions
No enterprise-level complexity or pricing. Solutions designed for growing businesses.

Ongoing Partnership
We grow with you, continuously optimizing and expanding your automation ecosystem.

Core Service Portfolio

AI-Powered Sales Automation

Transform your sales process from manual to automatic

- **Lead Generation & Qualification:** Automated prospect research, contact discovery, and initial qualification scoring
- **Intelligent Follow-up Sequences:** AI-driven email campaigns that adapt based on prospect behavior and responses
- **Sales Pipeline Management:** Automated CRM updates, opportunity tracking, and sales forecasting

Expected Impact:	200-400% lead increase
Time Savings:	20-30 hours/week
Implementation:	2-3 weeks

Smart Marketing Automation

Personalized marketing that scales itself

- **Content Generation & Scheduling:** AI-powered blog posts, social media posts, landing pages, and email campaigns
- **Customer Segmentation & Targeting:** Automated audience analysis and personalized campaign delivery
- **Performance Analytics & Optimization:** Real-time campaign analysis with automatic adjustments

Expected Impact:	150-300% engagement boost
Time Savings:	15-25 hours/week
Implementation:	2-4 weeks

Intelligent Management Systems

AI-driven business intelligence and decision support

- **Automated Reporting & Analytics:** Real-time dashboards and scheduled business intelligence reports
- **Task & Project Management:** Intelligent task allocation, progress tracking, and deadline management
- **Resource Optimization:** AI recommendations for resource allocation and efficiency improvements

Expected Impact:	40-60% efficiency gain
Time Savings:	10-15 hours/week
Implementation:	3-4 weeks

Operational Excellence Automation

Enterprise operations from end to end

- **Customer Service Automation:** AI chatbots, ticket routing, and automated response systems
- **Inventory & Supply Chain:** Automated ordering, inventory tracking, and supplier management
- **Financial Process Automation:** Invoice processing, expense tracking, and financial reporting

Expected Impact:	50-80% cost reduction
Time Savings:	20-25 hours/week
Implementation:	3-5 weeks

Specialized Solutions

AI Chatbot with RAG Integration
Intelligent customer service agents connected to your knowledge base for accurate, contextual responses.
24/7 Support · Multi-language

Custom Database Solutions
Tailored data management systems with automated workflows and intelligent insights.
Cloud-based · Scalable

Target Market & Ideal Clients

Ideal Client Profile

Business Size & Revenue

Annual Revenue:	$100K - $10M
Employee Count:	5-100 employees
Business Stage:	Growth/Scale Phase
Technology Adoption:	Early to Mainstream

Common Pain Points

- **Time Scarcity:** Spending too much time on repetitive tasks instead of strategic work
- **High Operating Costs:** Manual processes creating unnecessary overhead and reducing profitability

Inconsistent Growth: Unable to scale efficiently due to process bottlenecks

Resource Constraints: Limited team capacity preventing focus on core business activities

Industry Focus Areas

- E-commerce & Retail
- Healthcare & Wellness
- Professional Services
- Real Estate
- Food & Hospitality
- Logistics & Distribution
- Manufacturing
- Technology & SaaS

Client Readiness Indicators

Perfect Fit

- Recognizes need for change
- Budget allocated for automation
- Tech-savvy or tech-curious
- Clear growth objectives
- Willing to invest in optimization

Needs Education

- Skeptical of automation ROI
- Limited technical understanding
- Limited technology experience
- Resistant to change
- Unclear business objectives

Not Ready

- Very limited budget
- Highly specialized legacy systems
- Strongly resistance to change
- Unrealistic timeline expectations
- Unwilling to document processes

Geographic Strategy

Primary Market:	Greater Montreal
Secondary Markets:	Quebec Province
Expansion Target:	Eastern Canada
Long-term Vision:	North America

Technology Stack & Capabilities

Core Technologies

Automation Platform
n8n · Visual workflow automation
Enterprise grade automation platform enabling complex workflow creation, API integrations, and real-time data processing across multiple systems.

Cloud Infrastructure
Google Cloud Platform · Scalable cloud services
Robust cloud infrastructure providing AI services, secure data storage, and global scalability with 99.9% uptime guarantee.

Database Solutions
Supabase · Modern database platform
Open source database platform with real-time capabilities, built-in authentication, and automatic API generation.

AI & Integration Capabilities

AI Technologies

- Large Language Models (GPT, Claude, Gemini)
- Computer Vision & Image Processing
- Natural Language Processing
- Predictive Analytics & Machine Learning

Popular Integrations

- Email Platforms
- Social Media
- Payment Systems
- CRM Systems
- BI & Analytics Tools
- Scheduling Tools

Security & Compliance

- End-to-end encryption
- Multi-factor authentication
- SOC 2 compliant infrastructure
- GDPR & privacy compliance

Implementation Process & Methodology

Step-by-Step Process

1. **Discovery & Assessment**
   Comprehensive analysis of current business processes, identifying automation opportunities and defining success metrics.
   Duration: 3-5 business days · **Deliverables:** Automation roadmap & ROI projection

2. **Solution Design & Planning**
   Creating detailed technical specifications, workflow designs, and implementation timeline based on discovery findings.
   Duration: 2-3 business days · **Deliverables:** Technical specs & project plan

3. **Development & Configuration**
   Building and configuring automation workflows, integrations, and AI components according to specifications.
   Duration: 1-3 weeks · **Deliverables:** Functional automation systems

4. **Testing & Optimization**
   Rigorous testing of all automated workflows, performance optimization, and quality assurance validation.
   Duration: 3-5 business days · **Deliverables:** Tested & optimized systems

5. **Deployment & Training**
   Go-live deployment with comprehensive team training and documentation for ongoing system management.
   Duration: 2-3 business days · **Deliverables:** Live systems & training materials

6. **Support & Optimization**
   Ongoing monitoring, performance optimization, and iterative improvements based on usage data and feedback.
   Duration: Ongoing subscription · **Deliverables:** Continuous improvements

Project Approach

Agile Methodology

- Iterative development cycles
- Regular client feedback sessions
- Rapid prototyping and testing
- Flexible scope adjustments
- Continuous improvement focus

Client Collaboration

- Weekly progress updates
- Transparent communication
- Joint problem solving sessions
- Change request management
- Success milestone celebrations

Quality Assurance

- Comprehensive testing protocols
- Performance benchmarking
- Security vulnerability assessment
- User acceptance testing
- Documentation verification

Success Metrics

Time Savings:	70-90%
Error Reduction:	95%+
ROI Timeline:	2-6 months
Client Satisfaction:	98%+

Pricing Strategy & Investment Options

VELOCITY
$500
/month

- 1-2 core automation workflows
- Basic AI integration
- Email & calendar automation
- Monthly optimization review
- Email support

Perfect for
Solo entrepreneurs & small teams

ACCELERATE — MOST POPULAR
$1,500
/month

- 3-5 comprehensive automation workflows
- Advanced AI & ML integration

- Custom AI model development
- Enterprise integrations
- Advanced analytics & BI
- Weekly strategy & optimization
- Dedicated account manager
- 24/7 priority support

Perfect for
Large enterprises & mid-size

ROI Calculator

Typical Client Savings (Monthly)

Time savings (40 hours @ $50/hr):	$2,000
Operational efficiency gains:	$1,500
Revenue increase (5-15%):	$3,000
Total Monthly Value:	**$6,500**

400%+
Average ROI within 90 days

Guarantees & Terms

ROI Guarantee
If you don't see a positive ROI within 90 days, we'll work an additional month at no charge until you do.

Performance Guarantee
We guarantee 99.5% uptime for all automated systems or provide service credits for downtime.

Satisfaction Guarantee
30-day satisfaction guarantee with full refund if you're not completely satisfied with results.

Flexible Terms
Month-to-month subscriptions with no long-term contracts. Cancel anytime with 30-day notice.

Future Vision & Strategic Roadmap

2024-2026 Roadmap

Q4 2024: Foundation & Growth

- Launch core automation services
- Establish Montreal market presence
- Build initial client portfolio
- Develop case studies and testimonials
- Refine service delivery processes

2025: Scale & Expansion

- Expand to Quebec province
- Launch advanced AI solutions
- Develop strategic partnerships
- Introduce industry-specific packages
- Build remote delivery capabilities

2026: Innovation & Leadership

- Launch data marketplace platform
- Expand to North American markets
- Integrate robotics solutions
- Develop proprietary AI models
- Establish thought leadership position

Emerging Technologies

Data Marketplace Vision
Revolutionary platform where businesses can monetize their anonymized data while accessing valuable market intelligence from other companies.

Key Features:

- Secure data anonymization
- AI-powered data insights
- Revenue sharing models
- Industry benchmarking
- Predictive analytics

Robotics Integration
Expanding beyond digital automation to include physical robotics for comprehensive business transformation.

Applications:

- Warehouse automation
- Customer service robots
- Quality control systems
- Inventory management
- Delivery optimization

Next-Gen AI Capabilities

- Autonomous decision-making systems
- Predictive business intelligence
- Natural language business interfaces
- Emotional intelligence in customer interactions
- Quantum computing optimization
